

Vision & Scope Document

Multi-Tenant Restaurant Operations SaaS

System Vision

The NanaBurguer Platform is a cloud-native, multi-tenant SaaS system designed to digitalize and centralize restaurant operations.

The system is built from inception as a scalable SaaS platform, where each restaurant operates as an isolated tenant.

Objectives

- Replace manual and fragmented workflows
 - Provide real-time operational visibility
 - Enable scalable multi-restaurant management
 - Integrate with fiscal and notification services
-

Problem Statement

Restaurants commonly rely on:

- Paper-based workflows
- WhatsApp coordination
- Disconnected tools

This results in:

- Order errors
 - Lack of traceability
 - Inefficient operations
 - No accounting integration
-

Actors
